

**Datasheet**

# RS PRO Cogged V Belt

Stock No. 2056711

### Technical Specifications:

Top Width (mm)	13mm
Height (mm)	8mm
Inside length (mm)	813mm
Outside Length (mm)	850mm
Material	Black Rubber

## Features & Benefits:

Increased friction coefficient compared to wrapped belts means low slip, high efficiency and longer service life.

Universal Classical profile coupled with cogged cushion allows increased belt flexibility and improved longer lasting performance when compared to wrapped belts. Improved compression whilst running means reduced pulley wear. Fibre loaded raw edge cogged profile improves belt wear and slip resistance. Optimum performance at high rotational speeds. Pre-treated tension cords embedded in specially prepared insulation filler creates superior adhesion between all components, even with high dynamic loads.

Ideal for applications where wrapped classical v-belts are likely to reach performance limits.

## Standards

DIN 2215

ISO 4184
