

Datasheet**RS PRO Cogged V Belt**

Stock No. 2056714

**Technical Specifications:**

Top Width (mm)	13
Height (mm)	8
Inside length (mm)	940
Outside Length (mm)	970
Material	Black Rubber

Features & Benefits:

Increased friction coefficient compared to wrapped belts means low slip, high efficiency and longer service life.

Universal Classical profile coupled with cogged cushion allows increased belt flexibility and improved longer lasting performance when compared to wrapped belts. Improved compression whilst running means reduced pulley wear. Fibre loaded raw edge cogged profile improves belt wear and slip resistance. Optimum performance at high rotational speeds. Pre-treated tension cords embedded in specially prepared insulation filler creates superior adhesion between all components, even with high dynamic loads.

Ideal for applications where wrapped classical v-belts are likely to reach performance limits.

Standards

DIN 2215
ISO 4184
