

# LUMOTAST 22, emergency stop button, illuminated, 2 NC, Silver, Flat quick-connect terminal 2.8 x 0.8 tin-plated, reset by rotating, Mushroom head red, arrows white

### fields of application

- > Measurement-control-regulation
- > Mechanical and system engineering
- > Vehicle construction

### special features

- > Mounting hole diameter 22.3 mm
- > Night design: illumination of the arrows possible
- > Low mounting depth of 17.6 mm
- > Water jet protection class IP 65 on front
- > Switching elements with silver contacts
- > Contact configurations: 2 NC, 2 NC + 1
- > Quick-connect terminal
- > Complies with DIN EN ISO 13850

## description

The emergency stop pushbuttons comply with IEC 60 204, IEC 60 073, IEC 60 947 and VDE 0113 Part 1. They are protected against unauthorized actuation by a positively guided mechanical movement sequence in accordance with DIN EN ISO 13850. To protect against accidental actuation, a pressure point must be overcome and the pushbutton engages in the pressed position. Due to the shape of the actuating element, the emergency stop pushbutton is protected against blocking. This means that an initiated emergency stop procedure cannot be interrupted by jamming objects. See appendix for original operating instructions.

The compact LUMOTAST 22 emergency stop with quick-connect terminals is ideal wherever an emergency stop or emergency off is required and space is tight in front of or behind the front panel. This emergency stop is also available with a PCB terminal, see RAFIX 22 FS+ control component range.

#### (B) 2. General description and intended use

EMERGENCY STOP control units are electromechanical switching devices designed to protect persons. They are used for instant disconnection to achieve a safe status of machines, vehicles or other equipment in order to avoid or reduce risks or damage to main and machine.

The following standards and regulations apply to their start-up, use and technical inspections without limitation:

- Machinery Directive 2006/42/E0

Accident prevention regulations / rules for safety

Manufacturers and users of machines provided with EMERGENCY STOP control units are respon sible for ensuring that the operating instructions are observed and the applicable safety standards and rules complied with

For the installation and operation of EMERGENCY STOP control devices in line with the intended Hoff the Institution and operation or exercises 1 a rote to a session of the second of

#### 2. Description générale et application conforme aux prescriptions

Les auxiliaires de commande d'ARRÉT D'URGENCE sont des appareits de commutation élec-tromécaniques pour protéger des personnes. Ils servent à couper rapidement les madhines, les véhicules et les installations, à les amener dans un état de sécurité fiable pour éviter ou diminuer les risques de dommages corponels et de déglits matériels. Pour la mise en service, l'utilisation et les contrôles techniques, il faut respecter les prescriptions

- La directivo sur los machinos solon la normo 2006/42/EG
- Les règlements de sécurité ainsi que
- Les instructions sur la prévention des accidents / règlements de sécurité

C'est aux fabricants et utilisateurs de machines où des auxiliaires de commande d'ARRÉT D'URGENCE sont utilisés, qu'incombe la responsabilité du respect du mode d'emploi ainsi que des prescriptions et réalements de sécurité en viaueur

Pour l'installation et l'exploitation de dispositifs d'ARRÉT D'URGENCE, les exigences suivantes deivent être respectées et une évaluation des risques doit être menée en vue d'une utilisation en bonne at due forme:

EN ISO 13849 1-2015 . EN ISO 13850: 7008

#### EN ISO 13 849-2:2012 EN 60204 - VA1:2009

Aufbaut Die Not-Halt-Befehisgeräte bestehen aus einer Kombination von Betätigern mit einem oder mehreren Schaltelementen. Die Not-Halt-Befehlsgeräte gibt es als Enbauversion oder in

einem Gehäuse verbaut. Die Betätigung erfolgt durch Drücken, die Entriegelung erfolgt je nach Variante entweder durch

- Drehbewegung in beide Richtungen nach links oder nach rechts
- Ziehen entgegen der Betätigungsrichtung

Design: An EMERGENCY STOP button is an assembly of actuator combined with one or more contact blocks. EMERGENCY STOP buttons are available either as a panel mounting version or installed in a separate housing.

They are operated by pressing. Unlatching is done by one of two methods:

- Pulling against the direction of operation

Structure: Les boutons-poussoirs d'ARRÉT D'URGENCE sont composés d'une combinaison d'actionneurs ou de plusieurs éléments de commutation. Les boutons-poussidrs d'ARRÉT D'URGENCE sont disponibles en version intégrable ou installés dans un boitier.

L'actionnement s'effectue par appui sur ces demiers. Selon la variante, le déverouillage s'effectue

- Un mouvement de rotation dans les deux directions, soit vers la gauche, soit à droite
- Soit en tirant dans la direction opposée de la direction d'actionnement
