## Features

Invertible for bottom feed application.®

All devices convertible from main lug to main breaker and vice versa.

Mounting tabs on the trim hold it in place on the load center, freeing up both hands to drive the trim screws.

The pre-positioned bond screw eliminates bond strap/screw assemblies, and reduces the risk of losing components in the field.

The patented INSTA-WIRE™ neutral/ground system allows for faster installation because screws are backed out, ready for wire insertion. The visible neutral and grounds system aids in the insertion of conductors.

A rigid, sturdy base pan provides the ruggedness required for the most harsh applications.

Copper Bus

The outdoor enclosure has a slide hinge door for the easiest installation and can be removed by backing out only one screw.

PL Series Load Centers ship with trims packaged separately.

All devices are provided with 2 factory installed ground bars.

Combination head screw on the neutrals, ground, trim, upper pan, and bond screw provide installation flexibility.

# Riser Panel Load Centers

## 1-Phase, 3-Wire SN, 120/240Volts AC

### Riser Panel Load Centers<sup>①</sup>

Riser panel load centers are ideal for high rise applications. The shifted interior provides room for conductors to pass through the load center. The tap kits allow the installer to tap off from those conductors to power the panel.

#### Features

- UL Listed for use in 1Ø and 3Ø riser gutter applications.
- Copper bus standard.
- Main lug factory standard - convertible to main breaker.
- Neutrals aligned on left side- keeps way clear for riser cables.
- Available in 125 and 200 amp models.
- Invertible for left and right hand applications.

### Riser Gutter Tap Kit<sup>②③</sup>

The riser gutter tap kit (ECRLK250) allows the installer to tap off the main conductors, eliminating the need to cut completely through the conductor. The tap kit accepts 250 -1/0 on the main conductor side and 250-#6 on the tap side.

### Riser Gutter

The riser gutter (RAG24) is used to convert any load center 24" or larger into a riser panel.

#### Features

- Single and 3-phase applications
- Compatible with any single or 3-phase Siemens load center 24" or higher
- Flush trim included
- Load center mounting hardware and pass through brush included (Catalog no. RAG24)

# EQ Load Centers—Small Circuit Load Centers

## 1-Phase, 3-Wire SN, 120/240Volts AC

### Features/Applications

EQ Load Centers with main lugs feature a combination trim box in one package.

- Interiors offer removal in seconds
- Single phase
- One piece bus bar construction designed for use only with circuit breakers
- UL Listed
- UL listed on 60/75°C conductors (see equipment markings for applications)
- Positive load side circuit breaker hook rails
- Outdoor Type 3R devices on this page use HS Type hubs. See page 1-21.

### Small Circuit Load Centers

Ideal for subfeed applications

### Renovation Panel

Ideal for older home renovation projects where the distance between the studs is narrower than current construction practices. The narrower panel eliminates the need to 'notch' out the existing studs.

### Spa Panels

Spa Panels are ideal for outdoor applications requiring the use of ground fault protection, such as hot tubs. A factory installed 2-Pole GFCI breaker is provided, along with 2 extra circuits.

## Features

All main breakers are straight in wired- no backfeeding required.

Outboard neutral and groundbars allow for all neutral and ground connections to be located away from the breaker connections, making for a neat, clean installation

All devices are convertible from main lug to main breaker or vice versa with the addition of main breaker or main lug kits.

"Swiss Cheese" style neutral bars provide multiple 1/0 connection points.

All units include factory installed ground bar and isolated neutral.

Copper Bus

With the use of the included bonding strap, ground bars and neutral bars can be bonded for service entrance applications.

A rigid, sturdy base pan with metal hook rails provides the most rugged breaker connection in the industry.

Invertible for bottom feed application

The outdoor enclosure has a slide hinge door for the easiest installation and can be removed by backing out only one screw.

Mounting tabs on the trim hold it in place on the load center, freeing up both hands to drive the trim screws.
