Safety Ergo Extreme Blowgun with Extended Nozzle

Designed in the UK, this Ergo Extreme Safety Blowgun features a safety valve which ensures the air inlet will automatically be reduced to the recommended 2 bar. This virtually eliminates user error and ensures safety.

This Ergo Extreme Blowgun has been designed for easy storage with multiple hanging options. The ergonomically designed, rubber over mould handle offers increased comfort in use, while the easy to operate trigger allows precision control.

- Safety valve - 2 Bar regulated to eliminate user error and ensure safety
- Robust nylon filled material
- Traditional hanging ring with hanging also available between trigger and handle
- 9" extension nozzle can be further cut and bent to suit users application

SPECIFICATIONS

Inlet Size	1/4" BSPT
Maximum Pressure	10 Bar
Inlet	2 Bar regulated
Air Flow	11 cfm @ 100 psi
Noise Level	90 dBa
Conformity	EU/2003/10/CE
Nozzle Style	9" Extended Nozzle
