

FABCO-AIR

Filter - Regulator - Lubricator

Quick Reference Guide

Body Size	Port Size	Description
FA2	1/8, 1/4	FRL
FA3	1/4, 3/8	Filter, regulator, lubricator
FA4	1/2, 3/4	(Pages 4 & 5)
FA5	3/4, 1	

Body Size	Port Size	Description
FA2	1/8, 1/4	CL
FA3	1/4, 3/8	Filter regulator, lubricator
FA4	1/2, 3/4	(Pages 6 & 7)
FA5	3/4, 1	

Body Size	Port Size	Description
FA2	1/8, 1/4	CM
FA3	1/4, 3/8	Filter regulator, mist separator
FA4	1/2, 3/4	(Pages 8 & 9)

Body Size	Port Size	Description
FA2	1/8, 1/4	FR
FA3	1/4, 3/8	Filter, regulator
FA4	1/2, 3/4	(Pages 10 & 11)
FA5	3/4, 1	

Body Size	Port Size	Description
FA2	1/8, 1/4	FMR -Filter, mist separator, regulator
FA3	1/4, 3/8	(Pages 12 & 13)
FA4	1/2, 3/4	

Body Size	Port Size	Description
FA2	1/8	Gauges
FA3	1/8	(Page 22)
FA4	1/4	
FA5	1/4	

Accessories and Parts		
Pages 22 and 23		

Body Size	Port Size	Description
FA2	1/8, 1/4	C
FA3	1/4, 3/8	Filter, regulator combo
FA4	1/2, 3/4	(Pages 14 & 15)
FA5	3/4, 1	

Body Size	Port Size	Description
FA2	1/8, 1/4	F
FA3	1/4, 3/8	Filter
FA4	1/2, 3/4	(Pages 16 & 17)
FA5	3/4, 1	

Body Size	Port Size	Description
FA2	1/8, 1/4	M
FA3	1/4, 3/8	Mist Separator
FA4	1/2, 3/4	(Pages 16 & 17)

Body Size	Port Size	Description
FA2	1/8, 1/4	R
FA3	1/4, 3/8	Regulator
FA4	1/2, 3/4	(Pages 18 & 19)
FA5	3/4, 1	

Body Size	Port Size	Description
FA2	1/8, 1/4	L
FA3	1/4, 3/8	Lubricator
FA4	1/2, 3/4	(Pages 20 & 21)
FA5	3/4, 1	

Body Size	Port Size	Description
FA2	1/8, 1/4	Lock out, tag out valve
FA3	1/4, 3/8	(Page 22)
FA4	1/2, 3/4	

Body Size	Port Size	Description
FA2	1/4	3-way slide valve
FA3	3/8	(Page 23)
FA4	1/2	

1 Year Warranty

We warrant the Filter-Regulator-Lubricator product to be free from defects in material and workmanship for a period of one (1) year from the date of shipment from Fabco-Air.

(See **Product Precautions** on pages 17, 19 and 21.)

How to Order

Size (Regulator Max. SCFM @ 102 psi)

- 2 .. (28 SCFM)
- 3 .. (53 SCFM)
- 4 .. (106 SCFM)
- 5 .. (350 SCFM)

Description

Filter F
 Mist Separator (1µ filtration)..... M
 Regulator R
 Lubricator L
 Filter/Regulator Combo..... C
 Combo with Lubricator..... CL
 Filter, Regulator..... FR
 Filter, Regulator, Lubricator..... FRL
 Combo with Mist Separator CM
 Filter, Mist Separator, Regulator FMR

Regulators feature these gauges as standard:
Sizes 2, 3 & 4; square embedded (psi scale).
Size 5; round 1/4 NPT (bar and psi scale).

Series

FA **3** - **FRL** **2P** **A** **2** [] []

Port Size NPT

1/8 (Size 2 only) 1P
 1/4 (Size 2 and 3) 2P
 3/8 (Size 3 only) 3P
 1/2 (Size 4 only) 4P
 3/4 (Size 4 and 5) 5P
 1 (Size 5 only)..... 6P

Drain (requires 15 psi min.)

Auto Drain, Float Type..... A
 Pressure Differential Drain M
 (also allows manual release of fluids)

Filter Rating – Option

Leave blank for standard
 (5µ filtration std for sizes 2, 3 & 4;
 40µ filtration std for size 5)

- 5µ for size 5 1
- 25µ for sizes 2, 3, 4 & 5 2
- 40µ for sizes 2, 3 & 4 3

Pressure Range for Regulator - Option

Leave blank for standard 5 to 125 psi range

- 5 to 35 psi..... L
- 5 to 60 psi..... S

Gauge - Option

Leave blank for standard

- Block off plate B
- 1/8 NPT adapter plate C
- 1/4 NPT adapter plate D
- Round gauge w/adapter plate
- Small 1/8 NPT..... F
- Large 1/4 NPT..... G
- Square embedded MPa.... M

Example

Model Number **FA2-FMR2PM**

Series FA, body size 2, filter-mist separator-regulator, 1/4 NPT ports, with manual drains and standard pressure gauge.

SEE PRODUCT PRECAUTIONS ON PAGES 17, 19 AND 21.

How to Order

Description: Filter, Regulator, Lubricator

Series FA; Size 2, 3, 4 or 5

FA3 - FRL 2P A

Pressure range for regulator - Option:

Blank for standard 5 to 125 psi

L = 5 to 35 psi

S = 5 to 60 psi

Port Size NPT:

1P=1/8; 2P=1/4; 3P=3/8; 4P=1/2; 5P=3/4; 6P=1

Drain (requires 15 psi min.): A = Auto drain, float type

M = Manual/Pressure differential drain[‡]

Filter rating - Option:

(blank for standard of 5µ for sizes 2, 3 & 4; 40µ for size 5)

1 = 5µ; 2 = 25µ; 3 = 40µ

Gauge - Option:

Blank for standard

B = Block off plate

C = 1/8 NPT adapter plate

D = 1/4 NPT adapter plate

F = Small round gauge with 1/8 NPT adapter plate

G = Large round gauge with 1/4 NPT adapter plate

M = Square embedded MPa scale

[‡] Manual drain also opens as inlet pressure is reduced to less than 5 psi.

External Dimensions - inch (mm)

No charge for optional filter ratings, pressure ranges, or gauges.

Replacement Parts See page 23.

Filter Element: 5μ, 25μ & 40μ
Complete Bowl w/Auto Drain
Complete Bowl w/Manual Drain
Bowl only for filter
Bowl Guard for filter or lubricator
Regulator Diaphragm
Regulator Knob
Lubricator Bowl
Lubricator Pickup Tube (w/filter when applicable)
Lubricator Adjuster w/sight dome included
Lubricator Plug for Fill Port

Flow Characteristics - Inlet pressure = 102 psi

Pressure Characteristics

Set point conditions: Inlet pressure = 102 psi; Outlet pressure = 29 psi; Flow rate = 0.7 SCFM

Filter/Regulator Combo with Lubricator features square embedded outlet pressure gauge with psi scale (145 psi = 1.0 MPa = 10 bar) and one "T" Type mounting bracket.

"T" Type mounting bracket.

SEE PRODUCT PRECAUTIONS ON PAGES 17, 19 AND 21.

Product Precautions

Air Supply

⚠ Caution

1. This product is specifically designed for compressed air service, and use with any other fluid (liquid or gas) is a misapplication. For example, use with or injection of certain hazardous liquids or gasses into the system (such as alcohol or liquid petroleum gas) could be harmful to the unit or result in a combustible condition or hazardous external leakage. Manufacturer's warranties are void in the event of misapplication and manufacturer assumes no responsibility for any resulting loss.
2. Install an air filter as a preliminary filter on the inlet side of the mist separator to prevent unwanted clogging.
3. Supply and outlet connections must be made to ports marked "IN", "OUT" or marked with directional symbols.
4. Some compressor oils, cleaners, chemicals, solvents, paints and fumes will attack plastic bowls and may cause plastic bowl failure. Inspect bowls frequently to detect crazing, cracking, damage or deterioration. Immediately replace any crazed, cracked, damaged or deteriorated bowls.
5. Do not install on a compressed air line where the compressor is lubricated with, or the air contains, a material that will attack plastic bowls.
6. Vibration during transit of new equipment may loosen the filter and/or lubricator bowls. Check to be certain the bowls and guards are completely locked into position before pressurizing the unit.

Installation

⚠ Caution

1. Install this unit ahead of equipment that requires filtered air.
2. Install unit in a vertical position with filter bowl at bottom.
3. The mist separator should be installed in a pulsation-free location. Differential pressure greater than 15 psi may cause damage to this item and other downstream components.
4. Do not use for pressures lower than rated. F.R.L. unit has its own minimum operating pressure determined by the equipment and is designed specifically to function with compressed air. If used below the minimum operating pressure, a loss of performance and breakdown may occur.
5. Do not allow air flow more than rated flow. If the air flow is permitted outside the range of rated flow, even momentarily, drainage and filtered contaminants may splash through the outlet and may cause damage to this item and other downstream components.

Maintenance

⚠ Warning

1. DE-PRESSURIZE UNIT BEFORE ATTEMPTING TO REMOVE ANY COMPONENT, GUARD OR BOWL.
2. Replace the filter element every 2 years or when the pressure differential approaches 15 psi, whichever comes first, to prevent damage to the element.
3. Replace all bowl guards and lock securely before pressurizing.

Steel "MBCR" type mounting bracket and panel nut included

Regulators feature square embedded outlet pressure gauge with psi scale (145 psi = 1.0 MPa = 10 bar) and one "MBCR" Type mounting bracket and panel nut. Gauge for size 5 is round 1/4 NPT thread (bar and psi scale).

Orange stripe shows when knob is pulled away from housing allowing knob rotation to make outlet pressure adjustments.

SEE PRODUCT PRECAUTIONS ON PAGE 19.

Product Precautions

FABCO-AIR Inc. • Fax (352) 375-8024 • Web Site: www.fabco-air.com

Installation

⚠ Caution

1. This product is specifically designed for compressed air service, and use with any other fluid (liquid or gas) is a misapplication. For example, use with or injection of certain hazardous liquids or gasses into the system (such as alcohol or liquid petroleum gas) could be harmful to the unit or result in a combustible condition or hazardous external leakage. Manufacturer's warranties are void in the event of misapplication and manufacturer assumes no responsibility for any resulting loss.
2. Contaminants in the compressed air stream must be filtered and drained with a suitable component before reaching this regulator product.
3. Install the component that is the same pipe size as the line on which it is to be mounted. Do not use fittings that may restrict air flow.
4. Supply and outlet connections must be made to ports marked "IN", "OUT" or marked with directional symbols.
5. Unit must be mounted with adjusting knob in vertical attitude either up or down.
6. Install this unit ahead of equipment that requires regulated pressure.
7. When using in combination with a lubricator, always install this regulator before the lubricator.

Adjustment

⚠ Warning

1. Adjust the regulator while monitoring inlet and outlet pressure gauges. Turning the knob beyond reasonable resistance may damage internal parts.
2. The regulator is intended to be adjusted manually. Do not use tools on the regulator knob as this can cause damage.

⚠ Caution

- Pull the regulator knob to unlock. (Orange stripe will appear in the gap.)
- Make sure the knob is unlocked before adjusting the pressure and lock it after setting the pressure. Failure to unlock or lock may damage the knob or other parts and the outlet pressure may vary from expected settings.
- Push the regulator pressure knob to lock. If the knob is not easily locked, adjust it left or right slightly and then push to lock. (The orange stripe will be covered when the knob is locked.)

Specifications

Series / Model Size	FA2	FA3	FA4	FA5
Port size NPT	1/8, 1/4	1/4, 3/8	1/2, 3/4	3/4, 1
Operating media	Air			
Max. operating pressure: psi (MPa) (bar)	145 (1.0) (10)			
Regulating range: psi (MPa) (bar)	Standard 5 to 125 (0.04 to 0.85) (0.4 to 8.5)			
Max. flow rate*	28(800)	53(1500)	106(3000)	350(10000)
Temperature range	-5° to 52°C (+23° to 125°F)			
Construction	Relieving type			
Weight lb.(Kg)	0.4(0.2)	0.7(0.33)	1.9(0.85)	2.7(1.2)

* Flow SCFM (Lpm) @ 102 psi (0.7 MPa)(7bar) inlet pressure.

Replacement Parts

Product Precautions

Installation

Warning

1. This product is specifically designed for compressed air service, and use with any other fluid (liquid or gas) is a misapplication. For example, use with or injection of certain hazardous liquids or gasses into the system (such as alcohol or liquid petroleum gas could be harmful to the unit or result in a combustible condition or hazardous external leakage. Manufacturer's warranties are void in the event of misapplication and manufacturer assumes no responsibility for any resulting loss.
2. Contaminants in the compressed air stream must be filtered and drained with a suitable component before reaching this lubricator product.
3. Install as close as possible to the equipment which is to be lubricated. Be sure lubricator is accessible for easy filling.
4. Supply and outlet connections must be made to ports marked "IN", "OUT" or marked with directional symbols.
5. Install the same size unit as the pipe in use. Avoid using fittings, couplings, etc., that restrict airflow.
6. Vibration during transit of new equipment may loosen the filter and/or lubricator bowls. Check to be certain the bowls and guards are completely locked into position before pressurizing the unit.
7. Fill lubricator prior to pressurization by pouring oil into the bowl through the fill port.
8. Pressure must be disconnected from the lubricator and downstream air must be vented before removing the fill plug. Replenish the supply of lubricator oil through the fill port to the indicated level.
9. **USE CLEAN, NON-DETERGENT OIL**, preferably SAE 10 or lighter, such as Exxon Terrestic GT32 or equal. The rate of oil delivery may be controlled by turning the adjusting screw counter clockwise for more and clockwise for less oil. Once set, the variable orifice in the lubricator will maintain the same ratio of oil to air flow regardless of any change in the airflow rate.

Maintenance

Warning

1. **BEFORE SERVICING THIS UNIT READ ALL PRODUCT PRECAUTIONS ON PAGES 17, 19 AND 21.** Note the special warning information that applies to plastic bowls
2. **DE-PRESSURIZE UNIT BEFORE ATTEMPTING TO REMOVE ANY COMPONENT, GUARD OR BOWL.**
3. Inspect plastic bowls daily to detect crazing, cracking, damage or other deterioration. Immediately replace any crazed, cracked, damaged or deteriorated bowls.
4. Periodically remove the adjusting screw and clean the needle and the seat in the body by blowing off with an air blow gun.
5. If siphon tube is equipped with a filter, occasionally clean the filter by blowing off with an air blow gun.
6. Drain off any contaminants which collect in the bottom of the bowl.
7. Replace all bowl guards before pressurizing.

Fabco-Air Product Catalog Library

**Cylinders, Valves & Accessories**

Catalog CV9 details Pancake®, Square 1®, Multi-power®, Hi-Power™ and Longstroke™ air cylinder lines. Describes valves, air-over-oil tanks, boosters & accessories.

**Global Series™ Air Cylinders**
Cat. GC-15

Widest choice of models and options. Features non-lube service to 150 psi. Bores 12mm to 100mm
• Strokes 5mm - 150mm
• NPT or Metric ports

**Dual Function Slides**
Bulletin EDF-10

Either of two slide styles (gantry or thruster) can be made from a single set of parts. Users can inventory less parts and assemble styles as needed.

**Stainless Steel Body Air Cylinders**
Catalog SSB-03

Exact interchange in bores from 5/16" to 3", strokes to 32". Popular options includes magnetic piston, non-rotating, and position feedback.

**Multi-Power® Air Presses**
Catalog FP16

Details the powerful line of precision, force-multiplying air presses. Deliver forces to 11,000 pounds.

**Swing Clamps**
Bulletin #SC-DB04

Clamp arm rotates 90° as it extends away from the workpiece. Features standard magnetic piston.

**Pancake® II Cylinders**
Catalog Pan2-2

The direct industrial interchange. High strength composite cylinder barrel. 4 popular styles: Standard, Nonrotating, Multi-Power® and 3-position.

**New Linear Thrusters**
Bulletin GB-JA02

Features longer strokes to 10" – and 4mm round profile sensors with surge suppression and polarity protection.

**Stopper Cylinders**
Bulletin #ST-DIX04

Standard magnetic piston and a wide selection of styles. Roller direction is adjustable. Magnetic sensors can be mounted on body.

**Pneumatic Grippers**
Catalog GR-8

• SPG & LPG parallel jaw motion with strokes from 1/4" to 24" & forces to 402 lbs. • GR & GS angular jaw styles with on-the-fly adjustment.

**NFPA Interchangeable Air Cylinders**
Catalog NF-6

All the desirable NFPA mounts. Bores from 1-1/2" to 6"; strokes to 99". Aluminum or high strength composite cylinder body. Magnetic position sensing.

**Specialty Valves and Control Valves**
Bulletin #14CAN

• Composite body solenoid valves in 2 or 3-way, N/O or N/C, and manifoldable configurations. • Process Solenoid valves. • 5 Ported, 3 position, 1/4 NPT 4-way air valves.

**Linear Slides**
Catalog # LS-03

Line includes 6 families of slides, pick & place units, and thin parts placers. 5/16" to 4" bores. Guide shafts 1/4" to 1-1/2".
