

Altech double level terminals are the answer to high wiring density problems posed by certain unavoidable wiring arrangements. Double level terminals have the following advantages:

- Double wiring density available without extension of mounting rails.
- Interconnection/shorting can be done at both levels.
- Marking/identification by marking tags possible at both levels.

CDL4UN(I.S) internally shorted double level terminals are useful for distribution applications by using shorting links at lower levels.

**Now uses larger MT6 tag for easier visibility.**
