# 335/350/355/4 Screwdriver set Kraftform Plus Lasertip 200 mm-long blades, 4 pieces

Kraftform Plus - Series 300

 Part number:
 05347736002
 Weight:
 472 g

 Article number:
 335/350/355/4
 Country of origin:
 CZ

Customs tariff 82054000

number:

• Multi-component Kraftform handle for fast and ergonomic screwdriving

• Take it easy tool finder: colour coding according to profile and size

Hexagonal anti-roll feature against rolling away

• Extra-long blade for low-lying working situations.

KRAFTFORM

4-piece screwdriver set with Kraftform Plus handle for pleasant, ergonomic working that prevents blisters and calluses. Hard gripping zones for high working speeds whereas soft zones ensure high torque transfer. "Take it easy" Tool Finder with colour coding according to sizes. The hexagonal anti-roll feature prevents any bothersome rolling away at the workplace.

# 200 mm-long blades

Kraftform Plus - Series 300

# Lasertip prevents slipping out

### Lasertip

# Reduced contact pressure

Extra-long blade for low-lying working situations.

It happens time and time again that the tip slips out of the screw head when screwdriving, sometimes damaging valuable surfaces or even causing injury. The tips of the Wera Lasertip screwdrivers are microscopically roughened by means of a laser. This rough surface literally "bites" itself firmly into the screw head. Slipping out becomes a thing of the past.

A precisely-focused laser creates a sharp-edged surface structure. This laser treatment results in an edge hardness of up to 1000 HV 0.3. Wera Lasertip "bites" itself into the screw head and prevents any slips out of the recess. It is available for screwdrivers for slotted, Phillips and Pozidriv screws.

Wera Lasertip reduces the contact pressure required and enhances force transfer — meaning less screwdriving effort is required. Screwdriving becomes safer and easier.

Kraftform Plus - Series 300

# Wera BE + 7001 REBEIL

### Kraftform

The basic idea for the prototype of the Kraftform handle - that the hand should dictate the design has, right through to today, proved to be correct. In cooperation with the internationally recognised Fraunhofer IAO Institute, Wera developed a screwdriver handle designed to match the shape of the human hand as long ago as 1960s. After a long the development phase, the Wera Kraftform handle was launched to the market in 1968. It has been optimised through the years with new technologies, but has kept its proven shape. After all, the human hand has not changed either.

# Large contact area

The large contact area — with particularly high friction to the soft zones — results in high torque transfer without any bruising from the edges.

# Rapid hand repositioning

The hard materials used for the handle ensure rapid hand repositioning without any danger of the skin "sticking" to the handle. The surrounding hard zones with large diameters glide like wheels across the hand.

# "Take it easy" Toolfinder

Screwdrivers with "Take it easy" tool finder: colour coding according to profile and size stamp.
