Rotative flashlight - worklight ET-LIGHT

Pictures :

Specifications :

Rarely a flashlight has been that handy. Not only does the new ET-light integrate the most recent led technologies in the field of lighting (COB system, 2 led 1W ultra-low consumption) but it provides also a multitude of tricks which make it essential.

To achieve this result, first we have designed a chassis made of ABS ultra-resistant and impressively light. The handling has been carefully designed for an optimal user convenience. You can use it for an extended period of time without experiencing any fatigue.

To suit the requirements of professionals and demanding users this led torch is equipped with a remarkable light head that rotates 360° horizontally and 180° vertically. Whatever the area to be lit is, you will find necessarily the suitable adjustment without any effort.

A second lighting system located at the base of the flashlight allows a wide and powerful lighting. Place it on the ground or use its hook or its built-in magnet: this work lamp is the perfect mate of any handyman or craftsman.

Thanks to the led COB technology this lamp is as powerful as a larger size model. Its 7 hours endurance (5 hours with COB lighting) allows long time working.

Features :

Power: 150 lumens (COB)
Power: 2x60 lumens (led 1W)
Technology: 1 led COB + 2 led 1W
Size: 197x48x49mm
Battery: 4 AAA batteries
Warranty: 2 years
Gencode: 8423915455154
