Anti Static Heel Grounder

RS Stock number [340-7606](#)

Description

The 70050 premium heel grounder provides effective ESD protection. The dual layer cup is made from a black conductive layer and a white lining that prevents carbon marks on shoes. These units include a blue tab with carbon suffused fibres and a snap-loc system for quick and easy fastening and removal. Full elastic strap provides maximum "flexing" comfort. The snap-loc heel grounder is also available with a replaceable tab as item number 70051.

Components

- 1.5 mm thick, 38 mm wide, dual layer, a black conductive exterior with a white non-marking interior. Tab to cup resistance is 106 - 107 Ohms.
- 9.5 mm wide, 46 cm long blue polyester tab contains electrically conductive Snap-loc buckle detail carbon suffused fibres.
- 19 mm wide blue elastic material for comfort.
- 1 megohm, carbon film, 1/4 watt, moulded resistor.
- Black, snap-loc fastening system.
