For Gas Monitoring And Measuring

PYS 3228, PYS 3428 – Dual-Channel Pyros

Applications

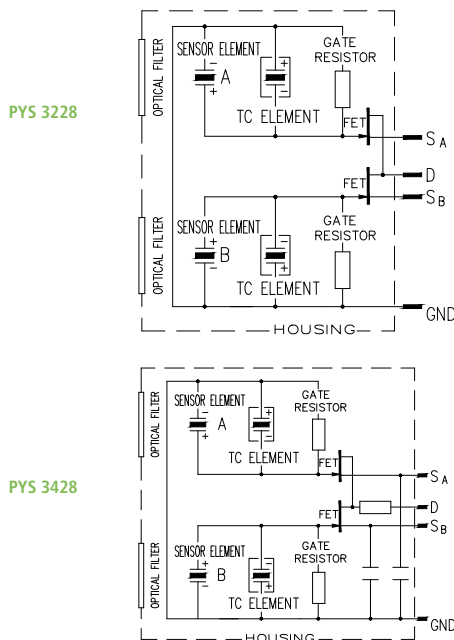

- Gas Sensing and Monitoring

Features and Benefits

- TO-5 metal housing
- Dual Channel Output
- Each Channel with individual Filter Window
- Selection of narrow band pass filters
- Thermal Compensation option

Product Description

As the successor to the LHi 814 series, the PYS 3x28 Dual-Channel detectors have become standard for gas sensing applications, with two, individual 1.5 x 1.5 elements, and with additional temperature compensation. They are available with a range of narrow band pass filters, as specified on page 4, in combination with a reference filter. The same features are included with the PYS 3428, which offers additional EMI protection by internal capacitors.
