

## Product Detail

SPK MPC® TB 2517  
**14MX34S68-2517**

UPC: 697950722191

Martin MPC® sprockets are manufactured to extremely close specifications and are stocked in minimum plain bore, Taper Bushed, Q.D. Bushed styles depending on size and pitch. Synchronous sprockets are non-slip toothed drives that require no lubrication. These sprockets have a wide speed range, are very efficient and make less noise than chain drives. Teeth on the belts are molded to conform with and engage the teeth on a mating sprocket.

Product Specifications	Misc Info		
Material	Steel	Number of Teeth	34
Belt Pitch	14MM	Construction Type	Solid
Belt Width	2.677 in.	Bore Type	Bushed
Outside Diameter	5.855 in.	Bushing	2517
Pitch Diameter	5.965 in.	Bushing Min Bore Size	0.500 in.
Flange Outside Diameter (Flanged)	6.460 in.	Bushing Max Bore Size	2.500 in.
Face Width	3.330 in.		

*Every effort is made to keep all dimensions and styles current in the catalog, however from time to time; it is necessary because of manufacturing changes to alter product dimensionally. If any stock product dimension or style shown in this catalog is critical to your application please consult factory for confirmation.*
