RS Pro 2000mm Long Unthreaded Stainless Steel Pipe

Product Details

Metric Tube

A range of RS Pro stainless steel 316L tubing in 2 m lengths. Available in a range of diameters from 6 mm to 12 mm.

Features and Benefits

- Supplied in 2 m lengths
- Straight ends
- Maximum working pressure 75 bars
- Maximum operating temperature 600°C

Product Details

Compression Fittings - Stainless Steel

Compression Fittings – Stainless Steel

Compression fittings suitable for use with a variety of tube materials including stainless steel, PTFE, semi-rigid nylon and polyurethane. Maximum working pressure is 80 bar (1160 psi) and maximum working temperature is 250°C at working pressure. The fittings can also be used for industrial vacuum applications. They come complete with sleeve nuts and olives. Welded 316L Stainless Steel (ASTM A312)

Specifications:

Nominal Outer Diameter	12mm
Length	2000mm
Wall Thickness	1mm
