Features

Hospital-Grade Power Cord is a Safe Solution for Medical FacilitiesThis hospital-grade cord features 14 AWG wire suitable for high power connections, making it a reliable solution for devices that require a higher-rated, heavier-gauge cable. The C19 end connects to a server, isolation transformer, power strip or other compatible hospital component. The NEMA 6-15P-HG green-dot plug connects to a hospital-grade AC power source located outside patient-care vicinities. The six-foot length allows you flexibility in placing equipment with respect to the power outlet.

Designed and Tested to Strict Hospital-Grade StandardsThis hospital power cord is tested to ANSI/UL 62 and 817 standards, as well as CAN/CSA C22.2 no. 21 and 49 standards, ensuring it's a dependable power solution for hospital environments.
