Americas Quick-Guard "S" Style

AQG panels are based on a 1500mm center to center dimension. If overall section is too long, it can easily be shorted by using standard hand tools.

The "S" Style utilizes the same 44mm x 44 mm extrusion as the post for it's upper and lower horizontal beams.

Using the supplied sweep guide you can easily hold your fence panel in position while you install the bracket kits, providing a uniform installation height for the mesh panels.

1500 mm center to center
1544 mm outside to outside

AQG panels are based on a 1500mm center to center dimension. If overall section is too long, it can easily be shorted by using standard hand tools.

The "E" Style utilizes the H-Channel (upper beam) and U-Channel (lower beam) extrusions for the horizontal beams.

Using the supplied sweep guide you can easily secure the JSM 37 support screw to the proper height, providing a uniform installation height for the mesh panels.
