

(Pin mounted style)

(Lead wire style)

Features

- Wide DC input voltage operation 9.5~32V
- DC/DC step-up converter
- Constant current output : 250mA to 700mA
- Wide output LED forward voltage up to 84V DC
- High efficiency up to 95.5%
- 2 in 1 dimming (0-10V, PWM)
- Protections: Short circuit / Over voltage
- Cooling by free air convection
- Fully encapsulated
- 3 years warranty

Applications

- DC battery source lighting
- Portable lighting
- LED solar street lighting
- LED greenhouse lighting
- LED Low-bay lighting

Description

LDH-25 series is a 25W DC/DC LED driver featuring constant current output. LDH-25 operates from 9.5~32VDC and offers models with different rated current ranging between 250mA and 700mA. With the high efficiency up to 95.5%, The 94V-0 flame retardant plastic case the fully-potted silicone enhance the heat dissipation allows this series to fit solar LED street light. LDH-25 is equipped with various function options, such as dimming methodologies, so as to provide the optimal design flexibility for DC source LED lighting system.

Static Characteristics

Standard Application

※ **2 in 1 dimming function**

- Output constant current level can be adjusted by applying one of the three methodologies between DIM+ and DIM-:
0 ~ 10VDC, or 10V PWM signal
- Direct connecting to LEDs is suggested. It is not suitable to be used with additional drivers.

◎ Applying additive 0 ~ 10VDC

"DO NOT connect "DIM- to Vo-"

◎ Applying additive 10V PWM signal (frequency range 1KHz ~ 3KHz):

"DO NOT connect "DIM- to Vo-"

Note: 1. Min. dimming level is about 8% and the output current is not defined when $0\% < I_{out} < 8\%$.

2. The output voltage is about equal to input voltage when dimming input is about 0Vdc, or 10V PWM signal with 0% duty cycle.

■ Efficiency VS Load

Application Notes:

1. The positive and negative input terminals must be connected correctly and negative voltage can not be input to avoid damage to the power supply.
2. Due to the large input current, please pay attention to the voltage drop of the wiring, to ensure the power supply to work properly.
3. At dim off, LDH output voltage will drop to the same level as input voltage. To get luminaires complete dark, please make luminaires are light off when they are driving by the input voltage.

■ Application Notes of EMC

1. If LDH-25 is powered by a battery, comply with EN55015 without additional Input filter and capacitors.
2. If LDH-25 is powered by DC Bus, additional EMC filter parts shall be added to meet EN55015. The recommended circuit is shown in Figure1
