

Datasheet

RS PRO METAL CONTENT TIE BLUE

Stock number: 172-1766 172-1765 172-1768 172-1767

EN

Material : NYLON 66 with metal powder, flammability 94-HB

Features and Benefits

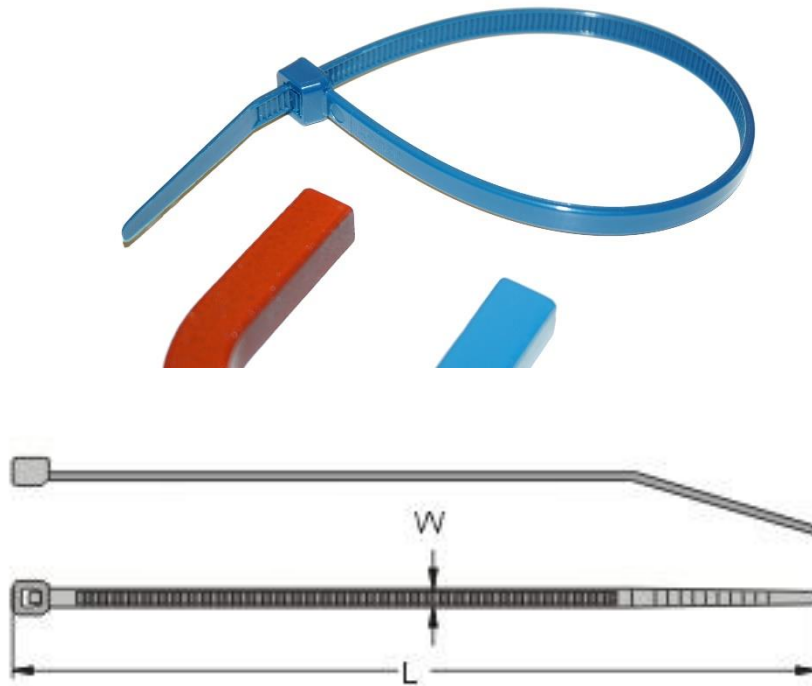

- Application: One piece self-lock cable tie for quick installation.
- Blue in colour to assist in detection
- Feature: Apply for Food and Medical industrial, FDA standard, can be detected by Metal sensor.
- Metal content ties have good corrosion resistance
- Magnetic and X-Ray detectable (detection level depending on specific application)

Cable Ties for food industry, detectable

Metal Content Tie is a cable tie specifically designed for use in the food and pharmaceutical processing industries.

During the manufacturing process, a metallic pigment is included which enables the ties to be detected more readily than standard ties

Metal content cable ties are ideal for fastening cables and hoses in processing and packaging areas to prevent contamination.

Unit:mm
