

## STAINLESS STEEL BUCKLES/CLIPS

### JAW & WING TYPE

#### KEY FEATURES

- Jaw type buckles for high tensile applications
- Wing type buckles for medium tensile applications
- Available in widths: 6.5 mm (1/4"), 9.5 mm (3/8"), 12.7 mm (1/2"), 16 mm (5/8") and 19 mm (3/4")
- Available in material: SS201/304/316

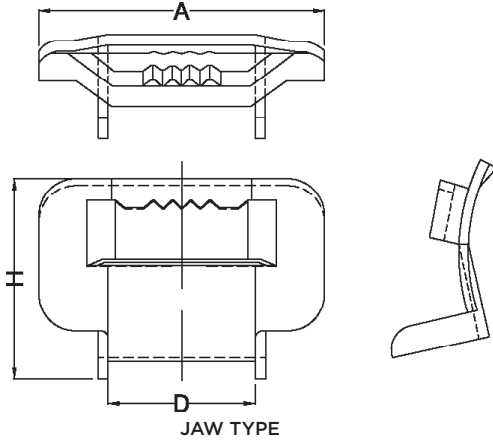

TE Connectivity's (TE), stainless steel buckles/clips form an integral part of the banding solution. Buckles are precision stamped components which sustain the clamping force of the clamping tool and forms a secure joint over the pipe/pole/cable when used in conjunction with bands.

SS buckles are designed with a wide range of widths (1/4" 1-1/4") and are suitable to accommodate corresponding bands. Made from high-grade stainless steel like AISI SS 201/SS 316/SS 304, buckles provide superior performance in high tensile / corrosive and hazardous atmospheres. Buckles are available in two constructions (jaw/wing type), jaw type being the industry preference for all applications.

Buckles are provided with round edges for safety of handling.

**Customers can count on consistent, high quality products, driven by TE's proven innovation and backed by our extraordinary customer support.**

# Stainless Steel Buckles/Clips Jaw & Wing Type

## HOW TO ORDER

Variant	Code
Clip Uncoated	TCU

Material	Code
SS 201	B
SS 316	E
SS 304	F

Width of Bands mm (in)	Code
6.5 (1/4)	6
9.5 (3/8)	9
12.7 (1/2)	12
16 (5/8)	16
19 (3/4)	19
32 (1 1/4)	32

Type	Code
Jaw	J
Wing	W

JAW TYPE BUCKLES
