

PRODUCT SPECIFICATION REPORT

ZEP GROOVY PASTE™

Lubricant and Anti-Seize Paste

DESCRIPTION

An industrial grade, anti-seize paste and lubricant for metal parts, pipes, and threaded fittings in a convenient, brush top can.

FEATURES

- Excellent Anti-Seize
- Water resistant
- Wide Temperature Range
- Stable Coating
- Compatible with many materials
- Environmentally Desirable

BENEFITS

- Prevents seizing caused by galling, galvanic action, fretting, fusion, pitting, thread distortion, breakage, rust, and corrosions
- Provides long term protection with just one application, outdoors or indoors, even in damp areas or against salt spray. Will not wash off.
- Coating withstands temperatures of -65°F to 2100°F (-54°C to 1100°C)
- Will not harden or fuse to metals, cake, evaporate or separate
- Can be used as an anti-seize on the threads of steel, stainless steel, steel alloy, cast iron, aluminum, copper, brass, and titanium parts and reduces friction and wear on plastic
- Paste contains no lead compounds traditionally found in this type of product.

APPLICATIONS

Formulated to meet the needs of industrial machinery, construction equipment, automotive parts, marine engines, farm machinery, and other types of equipment where seizing, fretting, or galling of parts is a problem.
