

Parallel Type Air Gripper: Wide Type

MHL2 Series

ø10, ø16, ø20, ø25, ø32, ø40

Built-in dust-protection mechanism

A scraper with a dust lip is adopted for all rod rotating parts.

Double-end type oil-impregnated resin bearings with a metal backing are used for all shafts.

Fingers synchronized by a rack and pinion mechanism.

A large amount of gripping force is provided through the use of a double piston mechanism, while maintaining a compact design.

Smaller auto switch mountable

An auto switch can be mounted at 4 locations.

Stroke Variation

Model	Bore size mm			
	10	16	20	25

				3-wire (NPN)			5 V, 12 V	M9NWV	M9NW	●	●	●	○	○	
	Water resistant (2-color indication)			3-wire (PNP)	12 V	M9PWV	M9PW	●	●	●	○	○	—		
				2-wire	5 V, 12 V	—	M9BWW	M9BW	●	●	●	○	○	—	
	3-wire (NPN)			5 V, 12 V			M9NAV**	M9NA**	○	○	●	○	○	IC circuit	
	3-wire (PNP)			12 V	M9PAV**	M9PA**	○	○	●	○	○	—			
	2-wire			12 V	M9BAV**	M9BA**	○	○	●	○	○	—			

** Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance.

* Lead wire length symbols: 0.5 m Nil (Example) M9NW

* Solid state auto switches marked with "○" are produced upon receipt of order.

1 m M (Example) M9NWW

3 m L (Example) M9NWL

5 m Z (Example) M9NZZ

Note 1) When using the 2-color indicator type, please make the setting so that the indicator is lit in red to ensure the detection at the proper position of the air gripper.

Note 2) When ordering the air gripper with the auto switch, the auto switch mounting bracket is included.

When ordering the auto switch separately, the auto switch mounting bracket (BMG2-012) is required.

Long stroke

One unit can handle workpieces with various diameters.

A large amount of gripping force is provided through the use of a double piston mechanism, while maintaining a compact design.

Double-end type oil-impregnated resin bearings with a metal backing are used for all shafts.

Built-in dust-protection mechanism

A high degree of freedom for mounting

Auto switch mountable

Applicable for Clean Series.
Refer to "Pneumatic Clean Series (CAT.E02-23)" catalog for details.

(Note) The open and close time spans represent the value when the exterior of the workpiece is being held.

⚠ Precautions

- ⚠ Be sure to read this before handling the products.
- ⚠ Refer to back page 50 for Safety Instructions and pages 366 to 374 for Air Gripper and Auto Switch Precautions.

⚠ Warning

If a workpiece is hooked onto the attachment, make sure that excessive impact will not be created at the start and the end of the movement.
Failure to observe this precaution may result in shifting or dropping the workpiece, which could be dangerous.

MHL2 Series

Gripping Point

- The workpiece gripping point distance should be within the gripping force ranges given for each pressure in the effective gripping force graphs below.
- If operated with the workpiece gripping point beyond the indicated ranges, the load that will be applied to the fingers or the guide will become excessively unbalanced. As a result, the fingers can become loosened and adversely affect the service life of the unit.

R: Gripping position (mm)

Effective Gripping Force

Indication of effective gripping force

The gripping force shown in the tables represents the gripping force of one finger when all fingers and attachments are in contact with the work.

F = one finger thrust.

Model Selection Example

Work form
Diameter x Length
200 mm x 20 mm plate

Work length: From the dimensions of models that have an opening width of 200 mm or more
MHL2-16D2
MHL2-20D1/D2
MHL2-25D1/D2

Work mass: 0.3 kg

Guidelines for the selection of the gripper with respect to component mass

- Although conditions differ according to the workpiece shape and the coefficient of friction between the attachments and the workpiece, select a model that can provide a gripping force of 10 to 20 times the workpiece mass, or more.
- Further allowance should be provided when great acceleration or impact is expected during workpiece transfer.
Example) For setting the gripping force to be at least 20 times the workpiece mass: Required gripping force = $0.3 \text{ kg} \times 20 \times 9.8 \text{ m/s}^2 \approx 60 \text{ N}$

Gripping point R = 70 mm

Operating pressure: 0.5 MPa

- Selecting the **MHL2-20D₁**
A gripping force of 73 N is obtained from the intersection point of gripping point position R = 70 and a pressure 0.5 MPa.
- The gripping force is 24 times greater than the workpiece mass, and therefore satisfies a gripping force setting value of 20 times or more.

MHL2 Series Auto Switch Installation Examples and Mounting Positions

Various auto switch applications are possible through different combinations of auto switch quantities and detecting positions.

1) Detection when Gripping Exterior of Workpiece

Detection example		1. Confirmation of fingers in reset position	2. Confirmation of workpiece held	3. Confirmation of workpiece released	
Position to be detected		Position of fingers fully opened	Position when gripping a workpiece	Position of fingers fully closed	
Operation of auto switch		Auto switch turned ON when fingers return. (Light ON)	Auto switch turned ON when gripping a workpiece. (Light ON)	When a workpiece is not held (Abnormal operation): Auto switch to turn ON (Light ON)	
Detection combinations	One auto switch * One position, any of ①, ② and ③ can be detected.	●	●	●	
	Two auto switches * Two positions of ①, ② and ③ can be detected.	A	●	—	
		B	—	●	
Pattern	C	●	—	●	
How to determine auto switch installation position		Step 1) Fully open the fingers.	Step 1) Position fingers for gripping a workpiece.	Step 1) Fully close the fingers.	
At no pressure or low pressure, connect the auto switch to a power supply, and follow the directions.		Step 2) Insert the auto switch into the auto switch installation groove in the direction shown in the following drawing.			
		Step 3) Slide the auto switch in the direction of the arrow until the indicator light illuminates.	Step 3) Slide the auto switch in the direction of the arrow until the indicator light illuminates. Move the switch further 0.3 to 0.5 mm in the direction of the arrow and fasten it.		
		Step 4) Slide the auto switch further in the direction of the arrow until the indicator light goes out.	Position where light turns ON		
		Step 5) Move the auto switch in the opposite direction and fasten it at a position 0.3 to 0.5 mm beyond the position where the indicator light illuminates.	Position to be secured		
		Position where light turns ON	Position to be secured		

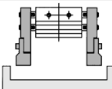

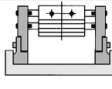

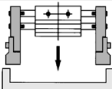

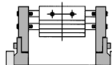

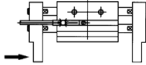

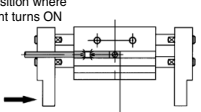

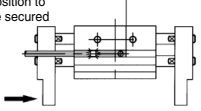

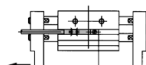

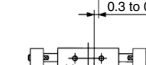

Note 1) It is recommended that gripping of a workpiece be performed close to the center of the finger stroke.

Note 2) When holding a workpiece close at the end of open/close stroke of fingers, detecting performance of the combinations listed in the above table may be limited, depending on the hysteresis of an auto switch, etc.

MHL2 Series Auto Switch Installation Examples and Mounting Positions

Various auto switch applications are possible through different combinations of auto switch quantities and detecting positions.

2) Detection when Gripping Interior of Workpiece

Detection example		1. Confirmation of fingers in reset position	2. Confirmation of workpiece held	3. Confirmation of workpiece released
Position to be detected				
Operation of auto switch		Auto switch turned ON when fingers return. (Light ON)	Auto switch turned ON when gripping a workpiece. (Light ON)	When a workpiece is not held (Abnormal operation): Auto switch to turn ON (Light ON)
Detection combinations	One auto switch * One position, any of ①, ② and ③ can be detected.	●	●	●
	Two auto switches * Two positions of ①, ② and ③ can be detected.	A	●	—
		B	—	●
C	●	—	●	
How to determine auto switch installation position		Step 1) Fully close the fingers. 	Step 1) Position fingers for gripping a workpiece. 	Step 1) Fully open the fingers. 
At no pressure or low pressure, connect the auto switch to a power supply, and follow the directions.		Step 2) Insert the auto switch into the auto switch installation groove in the direction shown in the following drawing. 		
Step 3) Move the auto switch in the direction of the arrow until the light illuminates and fasten it at a position 0.3 to 0.5 mm in the direction of the arrow beyond the position where the indicator light illuminates.		Step 3) Slide the auto switch in the direction of the arrow until the indicator light illuminates. 		
Position where light turns ON 		Step 4) Slide the auto switch a further distance in the direction of the arrow until the indicator light goes out. 		
Position to be secured 		Step 5) Move the auto switch in the opposite direction and fasten it at a position 0.3 to 0.5 mm beyond the position where the indicator light illuminates. 		
		Position where light turns ON 		
		Position to be secured 		

Note 1) It is recommended that gripping of a workpiece be performed close to the center of the finger stroke.

Note 2) When holding a workpiece close at the end of open/close stroke of fingers, detecting performance of the combinations listed in the above table may be limited, depending on the hysteresis of an auto switch, etc.

Auto Switch Mounting

- (1) To set the auto switch, insert the auto switch into the installation groove of the cylinder as shown below and set it roughly.
- (2) Insert the auto switch into the auto switch bracket installation groove.
- (3) After confirming the detecting position, tighten the set screws (M2.5) attached to the auto switch and set it.
- (4) Be sure to change the detecting position in the state of (2).

Note) Use a watchmaker's screwdriver with a grip diameter of 5 to 6 mm to tighten the set screws (M2.5).
The tightening torque should be 0.05 to 0.1 N·m.
As a rule, it should be turned about 90° beyond the point at which tightening can be felt.

Auto Switch Mounting Bracket: Part No.

Auto switch part no.	Auto switch mounting bracket part no.
D-M9□(V) D-M9□W(V) D-M9□A(V)	BMG2-012

Auto Switch Mounting Brackets: Precautions

When auto switch is set on the mounting side as shown below, allow at least 2 mm runoff space on mounting plate since the auto switch is protruded from the gripper edge.

Auto Switch Hysteresis

The auto switch hysteresis is shown in the table below. Please refer to the table as a guide when setting auto switch positions.

MHL2-40D□	M10 x 1.5	24.0	12

How to Mount the Attachment to the Finger

- (1) Make sure that the piston rod is retracted so as not to apply undue strain on the piston rod while an attachment is being mounted to the finger.
- (2) Do not scratch or dent the sliding portion of the piston rod. Damage to the bearings or seals may cause air leaks or faulty operation.
- (3) Refer to the table below for the proper tightening torque on the bolt used for securing the attachment to the finger.

Model	Applicable bolts	Max. tightening torque (N·m)
MHL2-10D□	M4 x 0.7	1.4
MHL2-16D□	M5 x 0.8	2.8
MHL2-20D□	M6 x 1	4.8
MHL2-25D□	M8 x 1.25	12.0
MHL2-32D□	M10 x 1.5	24.0
MHL2-40D□	M12 x 1.75	42.2
