## Description

Miniaturised single pole rocker switch/thermal circuit breaker combining ON/OFF switching and extremely fast overload performance in a single component (S-type TO CBE to EN 60934/IEC 934). Under overload conditions an internal neon (filament bulb for low voltages) illuminates to give a clear signal of the tripped status of the mechanism and thereby the cause of power interruption, suffix -B. Alternatively the illumination can be conventionally wired to indicate the ON status of the device, suffix -E. Returning the rocker switch through the OFF position and back ON will reset the mechanism and restore the supply. Largely temperature-insensitive. Complies with CBE standard EN 60934 (IEC 60934).

## Typical applications

Motors, transformers, solenoids, PCBs, hand-held machines, appliances, instrumentation.

## Ordering information

Please be informed that we have minimum ordering quantities to be observed.

Standard current ratings and typical internal resistance values

| Current <br> rating (A) | Internal <br> resistance ( $\Omega$ ) | Current <br> rating (A) | Internal <br> resistance ( $\Omega$ ) |
| :--- | :--- | :--- | :--- |
| 0.63 | 1.8 | 4 | $<0.1$ |
| 1 | 1.3 | 5 | $<0.1$ |
| 1.5 | $<1$ | 6.3 | $<0.1$ |
| 2 | $<1$ | 8 | $<0.1$ |
| 2.5 | $<0.15$ | 10 | $<0.1$ |
| 3.15 | $<0.12$ |  |  |

## Technical data

For further details please see: www.e-t-a.de/ti_e

| Voltage rating | AC 240 V ; DC 28 V (DC 50 V upon request) (UL: AC 250 V ; DC 48 ) |
