

BB-9SGF

DB9 Female Low-profile Gender Changer

Features

- Convert a device's DB9 male port to a DB9 female port
- Extend cabling run by connecting two DB9 cables
- Convenient, inexpensive in-the-field adaption tool
- Features two DB9 female connectors
- Slim 1.9 cm thickness easily fits in tight spaces
- Gold-plated contacts for high reliability
- RoHS-3 (2011/65/EU amended by 2015/863/EU)

Introduction

The versatile Model BB-9SGF gender reverser quickly and easily changes a port gender or joins two cables together. Save the cost of buying a new cable by changing the port gender and using a cable you already have. Quickly join two like cables together to extend a cable run.

The gender changer is molded and fully shielded, preventing EMI/RFI interference from office equipment.

Small, low-profile size saves space in installations – and in your toolbox. Keep a few on hand for field service calls.
