Effective November 2017 Supersedes August 2016

# FWC 10 x 38 mm Ferrule High speed fuse links

## **Catalogue symbol**

• FWC-(amps)A10F (1 to 32 A)

# Description

Ferrule style high speed fuse links.

- **Technical data**
- Rated voltage:
  - 700 V a.c./V d.c. (UL 1-4 A)
  - 600 V a.c. (UL 6-32 A)
  - 700 V d.c. (UL 6-25 A)
- Rated current: 1 32 A
- Breaking capacity:
  - 200 kA RMS Sym. at 600 V a.c. for 6-32 A
  - 200 kA RMS Sym. at 700 V a.c. for 1-4 A
  - 10 kA at 700 V d.c. for 1-25 A
- Operating class: aR

## **Agency information**

- CE
- UL Recognised JFHR8.E91958 for 6-32 A
- CSA Component acceptance class 1422-30 (53787) for 6-32 A

	FWC-32A10F

# **Features and benefits**

- Excellent cycling capability and DC performance
- Low arc voltage and low energy let-through (l<sup>2</sup>t)
- · Low watts loss in a compact size
- · Used with finger-safe holders/blocks

# **Typical applications**

- DC common bus
- DC drives
- Power converters/rectifiers
- Reduced voltage starters

## **Carton quantity**

• 10 per carton

#### **Carton weight**

• 0.1 (kg)

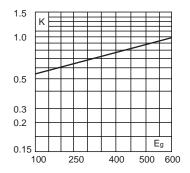

# BUSSMANN SERIES

## **Electrical characteristics**

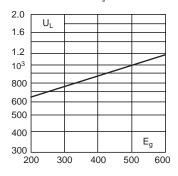

#### Total clearing l<sup>2</sup>t

The total clearing l<sup>2</sup>t at rated voltage and at a power factor of 15 percent are given in the electrical characteristics. For other voltages, the clearing l<sup>2</sup>t is found by multiplying by correction factor, K, given as a function of applied working voltage,  $E_{\alpha}$ , (RMS).

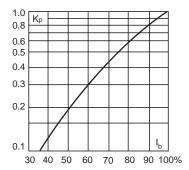

#### Arc voltage

This curve gives the peak arc voltage, U<sub>L</sub>, which may appear across the fuse during its operation as a function of the applied working voltage,  $E_{a}$ , (RMS) at a power factor of 15 percent.

#### Watts losses

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the watts losses at load currents lower than the rated current. The correction factor,  $K_{_{\rm P}}$ , is given as a function of the RMS load current,  $I_{_{\rm D}}$ , in percent of the rated current.

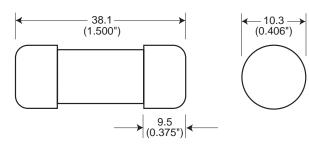

#### **Technical data**
